## B&O Tuner/Metronomes and Contact Mics

### TM-70

#### COMBO TUNER/METRONOME

- Equipped with high-precision tuner function and metronome function. The two functions can be used simultaneously.
- A wide detection range of C1-C8 supports a broad range of instruments.
- LCD needle meter with excellent sensitivity and visibility.
- Newly equipped with a transpose function that allows switching between in F, in B  $\flat$  and in E  $\flat$  in addition to chromatic.
- Calibration is adjustable to match various concert pitches.
- Sound Out mode and Sound Back mode are great ways to train your ear.
- Metronome features a wide tempo range from 30 to 252 beats/minute. Choose from three types of tempo settings and 15 rhythm variations.
- Long battery life of up to 250 hours
- Convenient memory backup function and auto power-off function.
- Foldable stand allows the unit to stand on its own.
- TM70-C includes CM400 compact microphone

### CM-400

#### CONTACT MICROPHONE

The CM-400 is a clip-type contact microphone using piezoelectric elements that transmits vibrations directly to the tuner by attaching the microphone to your instrument.

The CM-400 enables even more accurate tuning than the microphone on the tuner itself, and allows the tuner to detect the instrument's pitch more reliably, especially when practicing with a large group or in other environments where the signal is easily affected by other sounds.

- Durable, Disconnection-Resistant Cable
- Stable 3.5mm mini-plug
- Maximum width of clip: 30 mm / 1.2"
- Cable: 1.5 m / 5'

## AW Clip On Tuners

### AWLT100 ORCHESTRAL, GUITAR, BASS

The AW-LT100 provide stunning battery life with approximately 100 hours of operation using a single AAA battery. The body's lightweight design features triangular shuttle switches that allow intuitive operation.

- The AW-LT100M is equipped with a large clip that can be attached to a variety of orchestral instruments such as a clarinet, sax, oboe, bassoon, horn, euphonium, tuba, cello, or contrabass.
- The AW-LT100T is equipped with a small clip that's optimized for attachment to the bell of a trumpet, cornet, or trombone.
- The AW-LT100V is equipped with a dedicated clip that attaches firmly to the peg box of a violin or viola. The tuning meter is directly in your field of vision, and the tuner can be left attached without obstructing your performance in any way. In addition to the conventional chromatic mode, this tuner provides a violin mode and viola mode that let you tune with perfect fifths. In each mode, the string number is displayed beside the note name, ensuring a reliable and intuitive tuning experience.

- The AW-LT100G is designed specifically for guitar, providing an even faster and more accurate tuning experience.
- The AW-LT100B is designed specifically to recognize the low frequencies of your bass, making it easier than ever to tune.
